Dyestone Digiace Cleaner ST

1) Summary :

Dyestone Digiace Cleaner ST is the cleaning agent specially formulated for Dyestone Digiace Inks which is waterbased pigment ink for inkjet printing.

Inkjet print head is so sensitive, and it malfunctions with any irregular viscosity, surface-tension or particles of the inks; therefore, the whole system including the tanks, pipings and any internal ink delivery system which were pre-used with other materials need to be completely flushed and cleaned before newly putting Dyestone Digiace Inks into the system.

2) Nature :

Appearance	:	Transparent Liquid
p. H.	:	8.0 ± 1.0
Density	:	1.05 ± 0.05g/cm ³
Flash Point	:	Nil

3) Usage :

- Use 100% straight liquid.
- After take out the color ink from the machine, first well clean the ink delivery system with purified-water, and then put Dyestone Digiace Cleaner ST into the machine.

4) N.B. :

- ① Seal tight after use, and store under 30 degreeC in dark place.
- ② After cleaning with Digiace Cleaner ST, make sure the nozzle clogging has been fixed before pouring new color inks into the ink delivering system.
